UTILIZATION

HOW TO CLEAN YOUR BIKE CHAIN CORRECTLY

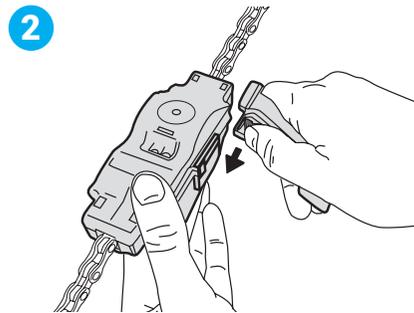

PREPARING THE CHAIN CLEANING

Cover the ground generously with newspaper or similar in order to prevent pollution of the environment and the soil. Coarse dirt, mud and sand should be removed beforehand with the supplied brush and sprocket cleaner or a rag.

Turn the chain on the smallest pinion. Bring the chain to a horizontal position by moving the large sprocket, or by adjusting it to a horizontal position. Now perform the following steps:

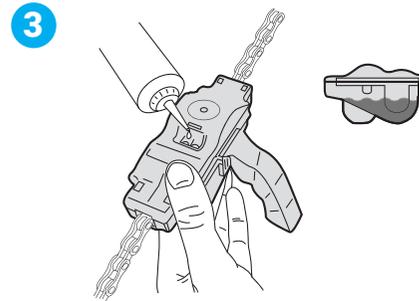

Open the case and lay the chain as it is shown into the guide. Make sure that the fastening rail of the handle points in your direction. Close the cover of the case and check the correct closure.

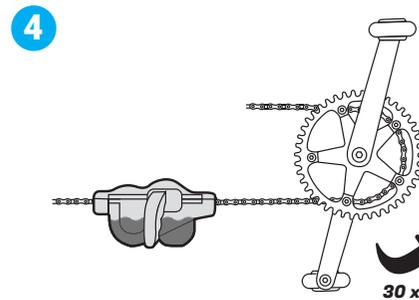

Slide the handle as shown on the prefabricated rail until it clicks into place.

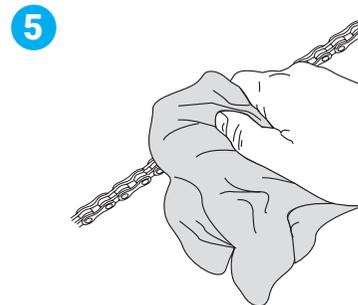

The casing is now closed and can be fixed by only holding the handle.

The casing can now be filled with chain cleaning fluid through the openings on the top. To avoid unnecessary leakage, fill up to the maximum of the displayed mark on the illustration.

Hold the filled case by the handle while moving the pedals 30 times around their own axis with a steady even speed, pulling the chain through the chain cleaner.

Open and empty the case and then wash it with water. Repeat steps 1-4 until the chain is sufficiently cleaned, depending on the degree of dirt.

Then dry and lubricate the chain with professional lubricant for bicycle chains.

ADDITIONAL INFORMATION

- In the second run (step 5), water with detergent can also be used.
- Do not use volatile or flammable solvents such as petrol, etc.
- Do not store any cleaning fluids in the casing.
- Dispose the residues of the cleaner environmentally friendly.

THANK YOU FOR YOUR PURCHASE!

We hope you are satisfied with the product. Please do not hesitate to contact us for any further questions or suggestions.

ARE YOU SATISFIED?

Our business lives from recessions and valuations. We would be very grateful if you could take a moment to evaluate our product on Amazon.

DO YOU HAVE ANY FEEDBACK?

We are always interested in feedback and constructive suggestions. Our goal is to make your customer experience as comfortable as possible.

Do you have a tip for us? Then write us a short e-mail:
